

4 reasons to choose a hosted telephony platform

Hosted Telephony is a complete communications service for business that provides an extensive range of fixed and mobile telephony capabilities, via an easy-to-use web portal. The service allows easy management of your telephony, whilst enabling employees to maximise their productivity.

Why move to a hosted solution?

Control

Dynamic, out of office based workforces demand a greater flexibility and with enhanced call management, calls can be set to mobile, desk or both. Missed a call? No problem, all voicemail can be centralised.

Cost

With no capital outlay, free internal calls and all maintenance costs built-in to your monthly subscription costs, costs can be significantly reduced.

Hosted Telephony

4 reasons to choose a hosted telephony platform

Scalability

You get great flexibility and scalability. If you want to open a new branch office, for instance, a phone system can be operational at the new site within minutes.

Security

A good hosted telephony platform will be run on it's own network and as such will separate voice data and public data. Similarly, it comes with 24/7 monitoring and support as well as having features such as authentication codes and pre-set limits on billing for additional peace of mind.

About incovo

incovo is a communications technology integrator of category leading unified communications, infrastructure, integrated network solutions and document management solutions to small and mid-sized organisations throughout the UK. Our focus is creating dependable, cost effective business communications solutions for businesses that ensure a variety of methods of collaboration to meet the ever changing market conditions.

At incovo, we provide fast and effective support to all of our customers through our multi-channel support network – allowing our customers to feel the benefits of compelling solutions that will enable their businesses to grow, tailored to their needs.
